Anti-Money Laundering and Countering the Financing of Terrorism (AML/CFT) Policy

Document ID: DCB-POL-AML | Version: 2.1 | Status: Current

Effective date: 2025-10-01

Classification: Internal | Owner: Compliance Department

1. Policy Statement

DCB is committed to preventing its products and services from being used for money laundering or terrorist financing. The Board approves this policy annually. The Designated Director oversees compliance and the Principal Officer is responsible for reporting to the Financial Intelligence Unit - India (FIU-IND).

2. Alert Triage Service Levels

Transaction monitoring alerts are triaged within 1 working day for High priority, 3 working days for Medium priority and 5 working days for Low priority alerts. A full investigation must be completed within 15 working days of alert generation. Extensions require approval from the AML Investigations Lead and must be recorded in the case file.

3. Internal Escalation of Suspicion

Where an investigator forms a suspicion that a transaction or pattern of transactions may involve proceeds of crime, the case must be escalated to the Principal Officer within 2 working days. Escalation is made through the case management system with the full case file, evidence and a written rationale.

4. Suspicious Transaction Reporting

The Principal Officer decides whether a Suspicious Transaction Report (STR) is to be filed. Once the Principal Officer is satisfied that a transaction is suspicious, the STR is filed with FIU-IND within the statutory timeline (see regulatory digest DCB-RD-PMLA). No AI system, analyst or investigator may file an STR without the Principal Officer's recorded approval.

5. Prohibition on Tipping Off

Staff must not disclose to the customer or any third party that an STR has been filed, is being considered, or that an investigation is under way. Customer communications during an investigation must follow scripts approved by Compliance.

6. Training

All customer-facing and operations staff complete AML/CFT training within 30 days of joining and annually thereafter. Investigators complete an additional 12 hours of typology training each year.
