Sanctions and Watchlist Screening Procedure

Document ID: DCB-PRC-SCR | Version: 2.2 | Status: Current

Effective date: 2025-09-01

Classification: Internal | Owner: Compliance Department

1. Lists Screened

Customers, beneficial owners and payment counterparties are screened against the DCB consolidated watchlist, which includes sanctions designations, PEP lists and internal negative lists.

2. Match Threshold

Name matches with a similarity score of 0.85 or higher are generated as potential matches for review. Exact matches on name and date of birth are treated as confirmed matches pending verification.

3. Resolving Potential Matches

A potential match may be cleared as a false match only when at least two secondary identifiers differ, such as date of birth, nationality, or identity document number. The clearance rationale and the identifiers compared must be recorded. Unresolved potential matches remain open and contribute to the case risk score.

4. Confirmed Matches

Confirmed sanctions matches are escalated immediately to the Principal Officer and transactions are held pending decision.
